HPC in Italy

HPC offer in Italy: ISCRA

Italian SuperComputing Resource Allocation

The aim of ISCRA is to ensure adequate support to Italian scientists and engineers.

The allocation is of 600M core hours per year on

- FERMI

The access is by

- Online submission of proposals
- Peer-review process by an international panel

The proposal are scientifically evaluated by international reviewers and technically evaluated by Cineca experts.

Applications and codes are evaluated on the basis of their computational readiness.

Class B: Standard Projects; two calls / year
 1-10M core hours
 duration: 12 months
 FERMI only

Class C:

Small Projects

continuous submission, 12 selections per year

>50K core hours

typical request 1M

only two C projects approved per year

duration: 9 months

EURORA available (50.000h)

Trial:

on demand

L'offerta HPC in Europa: PRACE

Computing provisioning pyramid

PRACE offers access to Tier 0 (and Tier 1) systems

- **Preparatory Access**

- Intended for preliminary resource use required to prepare proposals for Project Access
- Technical review
- Continuously open calls

- **Project Access**

- Intended for individual researchers and research groups including multi-national research groups
- Technical and Scientific review

PRACE Tier 0 Access: CURRENT CALL

- Applications accepted on call
